

GALAXY

TRA:
Speed Rating: **A6**

The Agri-Star is designed with a graduated long-bar tread pattern. This bar is designed to give the shoulder an approximate 30 degree angle while the center shifts to a 45 degree angle. Utilizing this design creates a tire that gives great traction in the fields, yet wears well on road applications. The Agri-Star has been designed with Galaxy's mud-breakers. These mud-breakers enhance the ejection of dirt and mud from the tread area, improve traction and increase pulling power.
